

OSA THERAPY EFFICACY & EFFECTIVENESS

DISCOVER THE *EFFECTIVENESS EQUATION*[™]

How effective is your patient's therapy over the whole night's sleep?

See how the Effectiveness Equation[™] allows you to compare CPAP and Oral Devices over the whole night's sleep at www.effectivenessequation.com.

Every year more people suffer from obstructive sleep apnea (OSA). For patients with mild-to-moderate OSA, SomnoMed Oral Devices are an effective alternative for sleep apnea therapy.

SomnoMed Oral Devices are:

HIGH QUALITY

SomnoMed oral devices are made with high quality materials. Manufactured under ISO 13485 standards, are FDA 510(k) cleared, and offer up to three years of warranty.

COMFORT=PATIENT ADHERENCE

90% of SomnoMed patients report regular use of their device.¹

EVIDENCE-BASED CLINICAL EFFICACY

15+ clinical studies

demonstrate the efficacy of SomnoMed devices in treating patients with mild-to-moderate OSA²

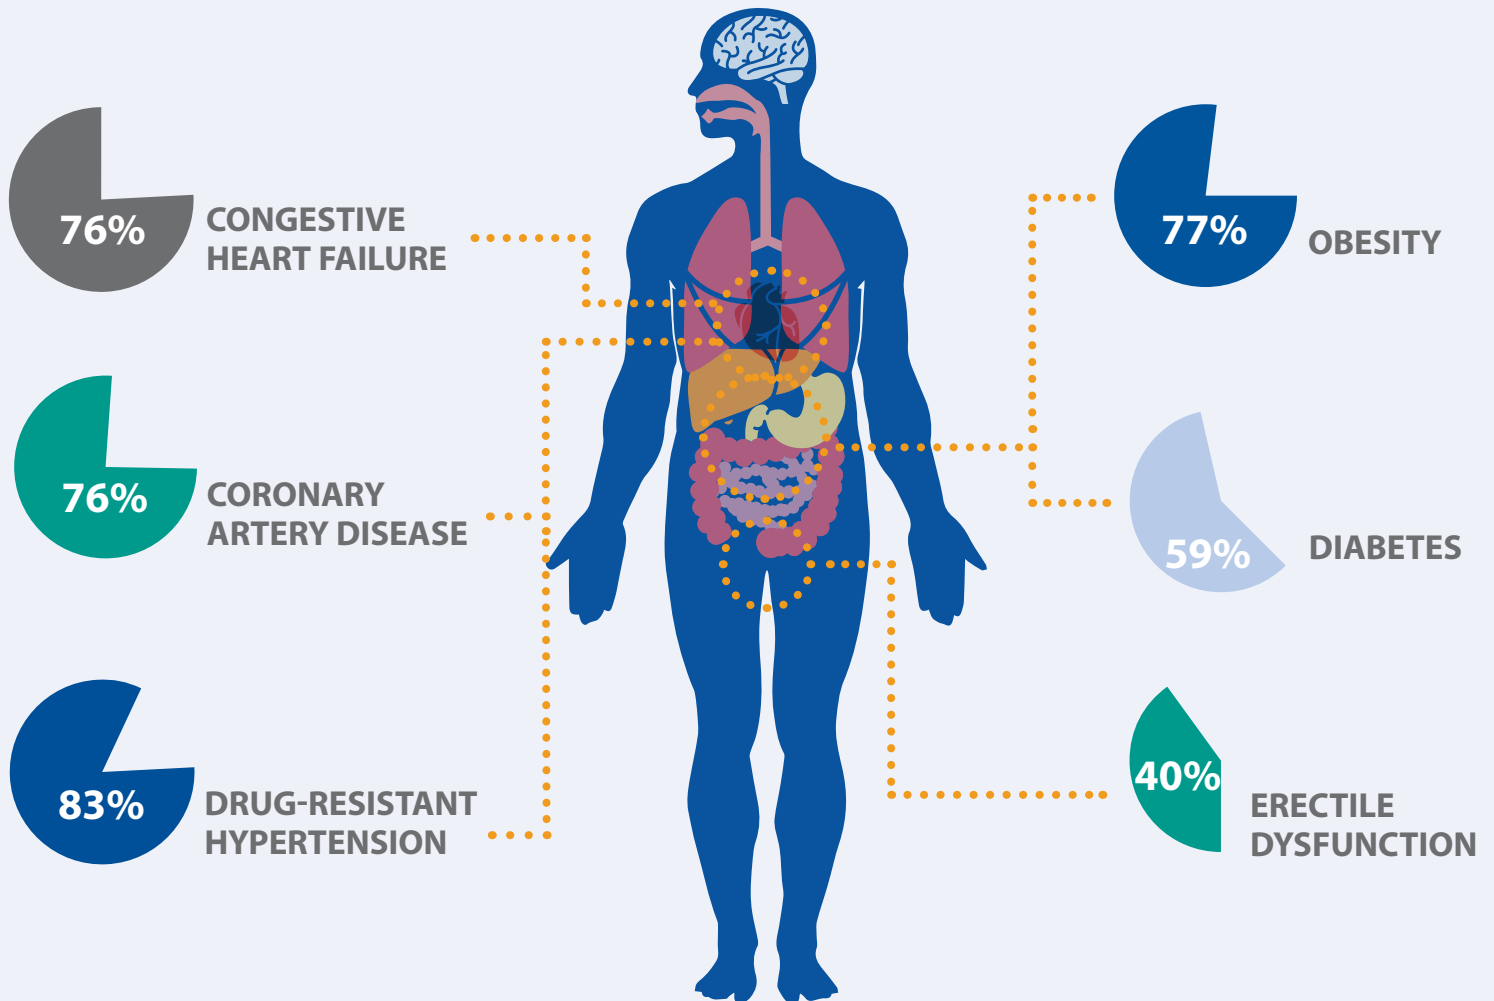

Intended for the treatment of night time snoring and mild to moderate obstructive sleep apnea in patients 18 years of age or older.

When OSA is left untreated, snoring and sleep apnea contribute to several significant comorbidities, as well as many other health complications.

Obstructive Sleep Apnea (OSA) patients are at higher risk for other serious health complications.²

Intended for the treatment of night time snoring and mild to moderate obstructive sleep apnea in patients 18 years of age or older.
